

Heatmap visualization of a 100x100 matrix, likely representing a correlation matrix. The matrix is labeled with GSM IDs on the left and bottom axes. The top of the image features a red bar on the left and a blue bar on the right. The heatmap shows a complex pattern of correlations, with many cells being white, indicating zero or near-zero values, and some cells being red or blue, indicating positive or negative values respectively.

**B. Checkpoint Expression: High vs Low Risk**

**C. Checkpoint – Risk Score Correlation**

**D. TIDE Score by Risk Group**
